DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-28, drawn to device and method of removing waste toner, classified in class 399, subclass 358.
 - II. Claim 29, drawn to method of removing waste toner, which requires a first cartridge and a second cartridge, classified in class 399, subclass 107.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the Invention II can be used with another waste toner device, not necessarily the device of Invention I, because Invention II requires a device having a first cartridge and a second cartridge not required by Invention I. Invention I requires an actuator not required by Invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
